 910-232-3760  [mpschramm@gmail.com](mailto:mpschramm@gmail.com)

 Bryan, Texas

I work at the intersection of environmental science and policy by facilitating water quality planning efforts with state agencies and local stakeholders. I provide expertise in water quality modeling and assessment through the use of GIS and open source programming tools. My primary interest revolves around water policy and the evaluation of implementation effectiveness. I'm especially interested in leveraging open data and open source analytic tools to develop toolkits and resources for evaluating the environmental outcomes of policy implementation.

## SKILLS

Communication	academic writing, extension and outreach programming, stakeholder facilitation, technical and non-technical reporting
Programatic	grant writing, project management, proposal development
Technical	ArcGIS, Excel, 'git' (limited), 'Python', 'R'
Water Management and Science	statistical methods for water quality, TMDL development, water quality policy and regulations, watershed planning

## EXPERIENCE

current 2019	<b>Research Specialist III, TEXAS A&amp;M AGRILIFE RESEARCH AND EXTENSION SERVICE, Texas Water Resources Institute</b> <ul style="list-style-type: none"><li>Collaborated with researchers to design, plan, conduct, and coordinate water focused research projects. From 2016 through 2020, I helped secure over \$1.6 million in extramural grants and contracts.</li><li>Facilitate stakeholder engagement, conducted extension and outreach programming. From 2016 through 2020, I provided 59 public presentations with over 967 contact hours.</li><li>Supervise undergraduate and/or graduate students and other technical or field staff involved in research.</li><li>Represented TWRI at local, national, and international meetings to disseminate research findings and network with peers in the field.</li><li>Prepared research and implementation proposals to funding agencies; managed multiple projects and financial accounts to ensure successful completion of projects for sponsors.</li></ul>
2019 2016	<b>Research Associate, TEXAS A&amp;M AGRILIFE RESEARCH AND EXTENSION SERVICE, Texas Water Resources Institute</b> <ul style="list-style-type: none"><li>Provided technical support and stakeholder facilitation of watershed planning, TMDL, and I-Plan projects in collaboration with state water resource agencies.</li><li>Developed, evaluated, and applied research and statistical methods for water resources planning.</li></ul>
2016 2014	<b>Research Associate, OAK RIDGE NATIONAL LAB, Environmental Sciences Division</b> <ul style="list-style-type: none"><li>Developed relational database and methods to assess environmental mitigation at U.S. hydropower facilities.</li><li>Utilized statistical and geospatial methods to analyze movement and behavioral response data.</li><li>Published three peer-reviewed journal articles, two technical reports, and one conference presentation related to research findings.</li></ul>
2013 2012	<b>Graduate Research Assistant, UNIVERSITY OF DELAWARE, Center for Energy and Environmental Policy</b> <ul style="list-style-type: none"><li>Responsible for interviews, data analysis, and developing policy recommendations in two policy analysis reports delivered to the state General Assembly.</li></ul>

## EDUCATION

2013	Master of Energy and Environmental Policy, University of Delaware
2011	B.A. Environmental Studies, University of North Carolina - Wilmington
2004	B.S. Biology, University of North Carolina - Wilmington

## SELECTED PEER-REVIEW PUBLICATIONS

- Schramm MP, Bevelhimer MS, Scherelis C (2017) Effects of hydrokinetic turbine sound on the behavior of four species of fish within an experimental mesocosm. *Fisheries Research*, 190:1–14. DOI:10.1016/j.fishres.2017.01.012
- Schramm MP, Bevelhimer MS, DeRolph CR (2016) A synthesis of environmental and recreational mitigation requirements at hydropower projects in the United States. *Environmental Science & Policy*, 61:87–96. DOI:10.1016/j.envsci.2016.03.019

3. Pracheil BM, DeRolph CR, Schramm MP, Bevelhimer MS (2016) A fish-eye view of riverine hydropower systems: The current understanding of the biological response to turbine passage. *Reviews in Fish Biology and Fisheries*, 26(2):153–167. DOI:10.1007/s11160-015-9416-8

## SELECTED TECHNICAL REPORTS

---

1. Schramm M, Jha A (2020) Technical Support Document for Four Total Maximum Daily Loads for Indicator Bacteria in Neches River Tidal.
2. Schramm MP, deVilleneuve S, Jain S, Berthold A, Mohandass U (2019) Carancahua Bay Watershed Protection Plan.
3. Schramm MP, Broad T, Arsuffi T (2018) *Escherichia Coli* and Dissolved Oxygen Trends in the Upper Llano River Watershed, Texas (2001-2016).
